

AUTOMATION TEST AND MEASUREMENT PARTNER

As a recognized partner in the **automation, test and measurement** world for many years we have been involved in many successful stories of our partners and users. By providing and integrating quality software tools, automation, measurement and test equipment, complete solutions and professional services we have been helping and supporting our users and partners in achieving their goals and growth from taking simple physical measurements all the way to RF communication design and test. By representing leading recognized suppliers like **NI/Emerson, Cadance, Doosan Robotics, Opal RT, Chroma, Gantner Instruments, Ettus Research, Liquid Instruments, TMYATEK, Quanser, Noffz, Loumas, Kyowa, Edibon, WTS** we have been growing our experts and expertise to be able better serve you, our users and partners.

We are expanding our portfolio of services and products with new recognized suppliers' offerings Doosan Robotics and WTS.

Doosan Robotics is a South Korean brand specializing in designing and manufacturing advanced industrial robots for production process automation. Doosan known for their high quality, reliability, and versatility.

Excellence beyond imagination. Switch on the Future.

WEISHI Technology is a high-tech enterprise focused on the development of advanced sensors. WTS has a diverse product portfolio, which includes various milrobots are itary-grade sensors acceleration sensors, high-impact sensors, MEMS vibration sensors, charge amplifiers, data acquisition and signal processing systems.
